

TAPERED POLYISO SYSTEM

TAPERED POLYISO GF SYSTEM

For flat or low sloped conventional roof assemblies

ModulR insulation technology

- Available in 4' x 4' sheets
- Available in 1%, 2% and other common slopes
- Available in a variety of standard thicknesses or "R"-Values
- Packaged to simplify on site management and installation
- Manufactured from industry leading certified polyisocyanurate suppliers
- Adhered with hot bitumen, cold applied adhesives or with mechanical fasteners
- Ideal with all types of roofing membranes including Single-Ply, Mod Bit and BUR
- Custom tapered systems, backslope, crickets and drain sumps to meet most drainage requirements

The closed cell polyisocyanurate foam insulation boards in the GF products are covered with an inorganic glass facer
